1. Please check which stormwater tool you would like to have installed:

- Downspout Planter
- Rain Garden
- Depaving or permeable pavers (in place of existing concrete)

1a. If you checked depaving, tell us which follow-up treatment you would like:

- Grass or sod
- Landscaping/vegetation
- Clean stone
- Permeable pavers

2. If you have a fixed budget for your project, please tell us your price range:

3. Please describe any additional work you are planning to have performed in addition to the primary stormwater management treatment. (ex. retaining wall, fence, etc. Please include as much detail as possible.)

What happens next?

Before having your stormwater tool installed, you must first have one of our preapproved contractors visit your home for a consultation. At this point you can confirm the precise scope of work (ex. surface area, follow-up treatment, size of planter, etc.) The consultation fee is \$25 and is non-refundable, however if you choose to proceed with the installation, the \$25 will be credited toward the final cost of the project.

If you choose a downspout planter box, you must submit a \$75 installation fee after the consultation (\$100 total - \$25 credit). If you choose a rain garden, depaving or permeable pavers, following the consultation you will receive an estimate showing the total for the

project, the Rain Check contribution, and the remaining balance to you. Pending approval of the estimate on both your end and ours, we issue the contractor with a Notice to Proceed with the installation. PHS will pay the program subsidy to the contractor while any remaining balance is directly payable by you to the contractor.

Fees can be submitted online at <https://phsonline.org/programs/rain-check/cost-share-payment>. If you wish to pay by check or money order, it should be made out to 'PHS' and mailed to:

PHS, Attn: Rain Check
